ABOUT NIRVAECO

Welcome to NIRVAECO, a sustainable packaging brand focused on high-quality sugarcane bagasse food packaging solutions.

As part of Nirvartaya Industries LLP, NIRVAECO is committed to developing practical alternatives to conventional plastic and petroleum-based food packaging. Our range of bagasse products is designed to combine functionality, durability, food safety, and environmental responsibility.

We believe sustainable packaging should not mean compromising on quality or performance. That is why we focus on products that meet the everyday needs of restaurants, food-service businesses, caterers, retailers, and other customers seeking more responsible packaging choices.

At NIRVAECO, our goal is simple: to make sustainable packaging more accessible and help businesses move towards a cleaner, more responsible future.

Biodegradable Strength You Can Trust

Harvesting Begins

Sugarcane is carefully harvested from farms. It's the starting point of this sustainable journey.

Juice & Bagasse

At factories, sugarcane is crushed for juice. The remaining fibrous pulp is known as bagasse.

Pulpboard Creation

The bagasse is processed into a soft, moldable pulpboard. This becomes the base for biodegradable products.

Eco Tableware Molded

Pulpboard is shaped into eco-friendly plates, bowls, and cups. A clean, green alternative to plastic.

Used & Composted

After serving their purpose, the products are composted. They break down naturally in a short time.

Back to the Earth

The compost enriches the earth with nutrients. This supports the growth of new crops — and the cycle continues.

COMMITTED TO PURPOSE

CREATING A BETTER FUTURE WITH BAGASSE

At NIRVAECO, our purpose is to make sustainable food packaging a practical choice for businesses around the world. We transform sugarcane bagasse, a renewable agricultural by-product, into thoughtfully designed food-service products that combine functionality, quality, and environmental responsibility.

OUR MISSION

To provide high-quality bagasse packaging solutions that help businesses move away from conventional plastic while meeting the demands of modern food service.
We focus on reliable products, consistent quality, and responsible material choices to make sustainable packaging accessible for restaurants, caterers, food-service businesses, retailers, and distributors.

OUR VISION

To build a globally recognized sustainable packaging brand powered by renewable materials.
We envision a future where sugarcane bagasse becomes a preferred material for food packaging, supporting the transition towards more responsible consumption and a more circular approach to resources.

OUR Aim

To make NIRVAECO a trusted name in sustainable food packaging.
Through continuous product development, quality improvement, and collaboration with customers and partners, we aim to deliver packaging that performs in real-world applications while helping businesses make more responsible material choices.
